Kishore Kumar

872-228-6682 • vkishorekumar1898@gmail.com • Dallas, TX 75251

Summary

Java Full Stack Developer with extensive experience in Agile methodologies and cloud solutions. Proficient in Java 17, Spring, and Angular, with a proven track record of developing scalable applications and REST APIs. Demonstrated ability to enhance system efficiency and user experience through innovative problem-solving and effective project management. Committed to delivering high-quality software solutions in fast-paced environments.

Skills

- Java 8, 11, 17
- J2EE
- UNIX shell scripting
- Python 3.6
- C and C++
- HTML, HTML5, DHTML
- XML and JSON
- CSS and Bootstrap
- JavaScript and frameworks
- Servlets and JSP
- JavaBeans and APIs
- AJAX and Tomcat
- WebSphere and Jetty
- Jenkins and JBoss
- Spring and Hibernate
- AngularJS versions 1.x to 2.x
- Struts versions 1.x to 2.x
- Log4J and JQuery
- Node.js and Backbone.js
- SQL databases: Postgres, MongoDB, Cassandra
- Cloud platforms: AWS, Azure, GCP
- Operating systems: Windows, UNIX, Linux, Mac OS, Ubuntu
- Agile methodologies: Scrum, TDD, SDLC

Experience

11/2023 - Current

Java Full Stack Developer, **DUKE UNIVERSITY**

- Developed the functionalities using Agile Scrum Methodology.
- Extensive experience in various Agile methodologies like Test Driven Development (TDD).
- Involved in developing Ul using Spring MVC framework, JSP, JSTL, HTML5, CSS, JavaScript, Query, AJAX and Angular]S.
- Extensively used core java concepts like Multithreading, Collections Framework, File 1/0 and concurrency.
- Experience in Core Java concepts such as OOP Concepts, Collections Framework, and Exception Handling, 1/0 System, Multi-Threading, JDBC, Generics.
- Used Java 17 features in developing code like Lambda expressions, creating resource classes, fetching documents from database.
- Used design patterns like Singleton, Data Access Objects, Factory and MVC patterns.
- Testing and production support of core java based multithreading ETL tool for distributing loading XML data into Oracle database using JPA/Hibernate.
- Created POJO's and DAOs for the database entities using Spring JDBC annotation mappings.
- Integrated with Spring Cloud projects to provide distributed tracing and other features.

- Developed microservices with Spring and tested the application using Spring Boot.
- Used Spring Core annotations for Spring Dependency Injection, Spring MVC for Rest API's and Spring Boot for microservices.
- Development of cloud hosted web applications and REST APIs using Spring Boot with embedded Tomcat.
- Developed GSA, LSS and SDL using C++, multi-threading and socket programming.
- Deployed the application on Amazon Web services (AWS) and used it to provide a large computing capacity for scalable solutions.
- Deployed applications into Continuous integration environments like Jenkins to integrate and deploy code on Cl environments for development testing.
- Implemented Rest based web service using JAX-RS annotations, Jersey provider implementation. Integrated ActiveMQ and spring JMS API to send and receive message for the application's restful API.
- Experience in design and development of Web services, JAX-RPC, JAX-WS, RMI, JTA, JMS and XML, XSD, XSLT, X-Path.
- Wrote build scripts using Maven.
- Developed the persistence layer using Hibernate Framework by configuring the 1:1/1:M/M:M mappings in hibernate files and created DAO and POJO.
- Experience in NoSQL database like MongoDB installation, configuration and in designing MongoDB multi-shared cluster and monitoring with MMS.
- Installed the WebSphere MQ and involved in configuring MDB listeners, JMS resources, and queues and integrating with the WebSphere Application Server.
- Experience in working with NoSQL Database like MongoDB to manage extremely large data sets.
- Used log4j to print logging, debugging, warning, info statements.
- Involved in setting up Test automation and developed cucumber feature files and used Selenium for automated testing with TestNG.
- Used JIRA tool for Issue/bug tracking, monitoring of work assignment in the system.
- Experience in implementation of version control software GIT repositories.
- Environment: Java 8 ,11 and 17, HTML 5, CSS3, Bootstrap, JavaScript, JSON, core java, Angular 8, Maven 3.0, Java 1.8, Spring 4.x, Mule ESB, Restful Web Services, Rest API, jQuery, Gradle, Amazon Elastic Beanstalk, S3, Soap UI, Jenkins, Git, Elastic search, DOM, JAX-RS, Junit 4.4, Log4j, GCP, React, Apache Kafka, MongoDB, Docker, Agile Scrum.

10/2022 - 10/2023

Java Full Stack Developer, **Charter Communication**, Stamford, USA

- Involved in SDLC Requirements gathering, Analysis, Design, Development, testing production of application using Waterfall model.
- Used jQuery for basic animation and end user screen customization purposes. Also used CSS pre-processors (SASS).
- Involved in the development of presentation layer and GUI framework using Angular JS and HTML.
- Involved in rendering additional components with custom HTML tags using React.js.
- Involved in writing application-level code to interact with APIs, Web Services using AJAX and Angular resources.
- Developed code for Responsive web design in JavaScript using frameworks like Angular.js, React.js.
- Used the Collections API, Generics, multi-threading while developing code.
- Method references are used provided in Javas to make use of methods already named.

- Database development required creation of new tables PL/SQL stored procedures, functions, views, indexes and constraints, triggers and required SQL tuning to reduce the response time in the application.
- Involved in the struts upgrade to 2. which involved changes to action class.
- Experience in developing LINUX shell scripts for automating deployment of applications.
- Developed Spring middleware components for implementing business logic and implemented SOA based architecture using web services to build a loosely coupled system.
- Designed and developed Business components and Integrated with Spring framework and developed various reusable Helper and Utility classes, which are used across all the modules of the application.
- Used RESTful for producing web services and involved in writing programs to consume the web services.
- Deployed the java application using Maven build script.
- Used Log4j for logging various levels of information like error, info, and debugging into the log files.
- Performed GitHub/GitHub-Desktop bash and Terminal commands to clone, fetch, merge and push the code and create pull requests for changes that are made.
- Designed enterprise API's and involved in developing the APIs. Involved in testing API's using SoapUI and Postman.
- Implemented Swagger for the microservices for Documenting Rest API.
- Implemented Rest API Design Guidelines for microservices.
- Involved in writing Maven scripts for automated deployment of the application and managed GitHub Projects and migrated from SVN to GitHub with merge and version and used Jenkins for continuous integration.
- Involved in working with the QA to assist in writing test code and debugging the defects in the application.
- Responsible for making sure that all systems upgrade logs were current and creating a report for management.
- Stamford CT.
- Environment: JDK 1.8, Spring 4.1,JavaScript, DOCKER,JDBC, Reactjs, AOP,REST, PL/SQL ,Transaction Management), Hibernate 4.0, JAX-RS Web services, JAX-WS Web services, JSON, Apache CXF, jQuery 1.9, jQuery UI, AJAX, UML, MS Visio, JSTL, Oracle 11g, Web sphere 7.1, Eclipse 4.2, Apigee, Junit, XMLSPY, SOAPUI 5.1, Log4j, Maven 3.1, GIT, AWS, NodeJS, Bootstrap, , HTML5, CSS3.

03/2022 - 09/2022

Java Full Stack Developer, **Truist Bank**, Charlotte, USA

- Developed the application using Agile Methodology.
- Involved in writing the action classes and from beans for different modules using Spring MVC.
- Involved in developing applications using Spring Framework for Dependency Injection.
- Involved in writing the validation rules classes for general sever side validations for implementing validation rules as per design.
- Developed back-end logic with Core Java 11 and 17 using technologies including Collection Framework, Multi-Threading.
- Worked on enhancements using JSP, Struts, database stored procedures and wrote SQL queries.
- Used Ul components, Angular JS directives, controllers, view and routing, service modules, validations using HTML5, applying styles using CSS, used jQuery to make Ajax calls.

- Used Amazon Web Services (AWS) data store for storing records, prescriptions, bills etc. and accessed them using AWS SDK for Java utilizing NoSQL queries.
- Created SOAP Web Services using WSDL, ML and SOAP for transferring data.
- Configured the deployment descriptors in Hibernate to achieve object relational mapping.
- Used Hibernate Cache for queries to improve the application performance.
- Wrote backend scripts that performed maintenance tasks on the contract data using JDBC.
- Developed Stored Procedures and Triggers on Oracle Database.
- Deployed AJAX calls for asynchronous data retrieval from back-end.
- Used Maven to build the J2EE application.
- Build & Deployment in WebSphere Application Server.
- Understanding server configuration and diagnosing problems in a time sensitive manner.
- Code walks through, modules integration and unit testing.
- Fix problems discovered that are within the existing system functionality (Preventive Maintenance).
- Used Log4j for logging purposes.
- Designed use cases, sequence and class diagrams, activities, states, objects and components. Used UML (MS Visio) for software design.
- Charlotte, NC.
- Environment: Java 1.7, Servlets, JSP, JUNIT, Spring 2.5.6/3.0, Spring ORM, Spring Form tags, JSTL, Hibernate 3.0, Oracle 11g, Maven, Apache Tomcat Server, SOA, Eclipse IDE 3.7, Jasper, Log4), Ajax, SOAP, PL/SQL, HTML, CSS, JavaScript, jQuery, Swing, JSON, SVN.

06/2019 - 08/2021

Software Developer, **HSBC**, Hyderabad, India

- Understanding Use requirements, participating in design discussions, implementation feasibility analysis both at front-end and backend level, documenting requirements.
- Coded Action classes, Java Beans, Service layers, Business delegates, to implement business logic with latest features JDK1.5 such as Annotations and Generics.
- Designed and developed User Interface with JSP, HTML, CSS, XHTML, JSTL, JavaScript, Custom Tags, Struts Tiles and Struts Tag library.
- Used Validator framework for validation of client-side data and exception handling using Struts exception handler.
- Worked on Web services using standard Web protocols such as XML, SOAP, and HTTP.
- Involved in the Struts upgrade to 2. which involved changes to action class.
- Migrated Jsp's from Struts to Struts2 eliminating custom tags.
- Developing Java Web Services for different phases. Used ETL framework to handle application requests using SOAP web services. Implemented data persistence using Hibernate.
- Used JDBC driver to connect to the Oracle database for all data transactions.
- Developed the application using IntelliJ IDE and used WebLogic server to deploy the applications and worked on the JMS queues and configured on WebLogic server.
- Used SVN to manage the versions and merge the code. Used Log back for writing the logs including errors, warnings, info.
- Hyderabad, India.
- Environment: Java, HTML, XHTML, CSS, JSTL, JavaScript, JSP, Servlets, Drupal, Custom Tags, JDBC, SOAP, HTTP, XML, IntelliJ IDE, WebSphere, JMS,Oracle, Log4j, SVN.

Education

Expected in 08/2027

Master of Science in Information Technology Management
Cumberland University, Lebanon, Tennessee, TN

01/2022
Masters in computer science
Governor State University, Chicago, Illinois

08/2020
Bachelors, computer science and engineering
JNTUK, India

Job Posting

Job Title: Software Developer
Company: KellyMitchell Group
